October 2005

INDUSTRY UPDATE . . .

In a continued effort to keep you and your company updated about the latest events in telecommunications:

The Digital Divide (Computerland October 2005)
Technology can bind and separate. It can bring us together and drive us apart. It can be used to promote the better aspects of humanness or to make the worst of ourselves more powerful. These things are hard to think about, and the future is, as we all know, not really predictable with any accuracy. There is, however, a trend for humans and IT that is occurring now, one that has far-reaching consequences. It has been referred to as the digital divide.

Businesses and households with slow or no access are at a distinct disadvantage because this is, after all, the Information Age. The Internet has become, for those with access, a primary source of information. Those countries and regions with wealth and infrastructure will continue to be the largest beneficiaries of Internet use. This is the operating definition of the digital divide.

Left alone, the digital divide will work all by itself to promote, sustain and enhance a growing economic divide in the U.S. and elsewhere in the world. One hopes that it won't be left alone. Besides the requirement to invest in the infrastructure needs of developing economies, there will undoubtedly be technology developments that can reduce the digital divide. How rapidly the infrastructure investments will be made isn't clear.

LET'S TALK!

G2 Solutions has been hard at work behind the scene to add and integrated additional services and providers aiming at truly becoming a *Single Source for Telecommunications!*

To that end we have developed 2 parallel tracks of services:

- A complete suite of services for which G2 solutions provides the implementation, billing, and support. These services include:
 - Local – Business Lines, Centrex, PRI, Local T1 (SuperTrunk) and Integrated Voice & Data circuits.
 - Long Distance – Switched and Dedicated
 - Private Lines – P2P, FR, etc.
 - Data – Dedicated Internet Access (DIA)
- Since not all providers offers a wholesale program, G2 has established an Agency relationship where services can be placed utilizing ALL major and regional service providers to supplement and extend G2 coverage. These services include:
 - Local – lines, PRI, T1 (SuperTrunk) and Integrated Voice & Data circuits.
 - Private Lines – P2P, FR, etc.
 - Data – ADSL, SDSL, DIA.

New from G2...

Local SBC Service Resale in California

G2 is happy to officially announce the roll-out of our SBC resale program in California. Customers get a single G2 Bill for all services. Program details, call options and commissions are posted on our Dealer's website. To view, use your login information.

Promo T1 DIA (Dedicated Internet Access)

Effective immediately and through the end of 2005 (signed paperwork must be turned in prior to the close of the last business day of 2005).

G2 Solutions offers the following promotion (no router):

Term	SBC Area	Verizon Area	NRC
1-Year	\$285.75	\$333.35	\$100.00
2-Year	\$250.00	\$291.67	\$50.00
3-Year	\$220.59	\$257.36	Waived

Pricing above does not include local loop – MRC and NRC.
Call (925) 708-8080 or email mg@g2sol.net for local loop quote.
